

The future of workplace

The Belgian company BuzziSpace was established in 2007. The new brand's designs became a worldwide hit almost immediately, as they responded to the global need to bring silence and style to the office. BuzziSpace designs can be used in changing environments worldwide: our offices, houses and other collaborative spaces are becoming increasingly compact and we are opting more frequently for open-plan spaces.

BUZZIVILLE

Upholstered workstations

BuzziVille allows you to develop your own little village in the office. A flexible and modular freestanding system that can easily be rearranged to the needs of the office space. It's possible to have both public and private space, and even informal meeting rooms. Collaborate together or work independently, all within the easily movable urban workspace.

BUZZIBLOX

Acoustic wall panel

BuzziBlox is a group of acoustic panels with different depths, developed to tune a room in the speech spectrum range and especially in the low and mid frequencies. By using alternating depths, the absorption of the different wavelengths into the thick layers of foam will be improved and make sure that the waves don't reflect back into the room. This diffusion effect will give the room a more pleasant sound experience. to control and monitor the sound in any given room.

BUZZISCREEN

Sound absorbing dividing screen

The Buzziscreen is a contemporary take on the flexible room divider with all sorts of advantages with folding feature . The handy recycled zipper system makes it easy for you to add panels. Just like with other Buzzispace products, you can pin objects, photos or letters to the screen, and of course it works as sound absorption as well. Divide your office or room however you want, wherever you want!
