

*The future of workplace*

The Belgian company BuzziSpace was established in 2007. The new brand's designs became a worldwide hit almost immediately, as they responded to the global need to bring silence and style to the office. BuzziSpace designs can be used in changing environments worldwide: our offices, houses and other collaborative spaces are becoming increasingly compact and we are opting more frequently for open-plan spaces.

# BUZZIHIVE

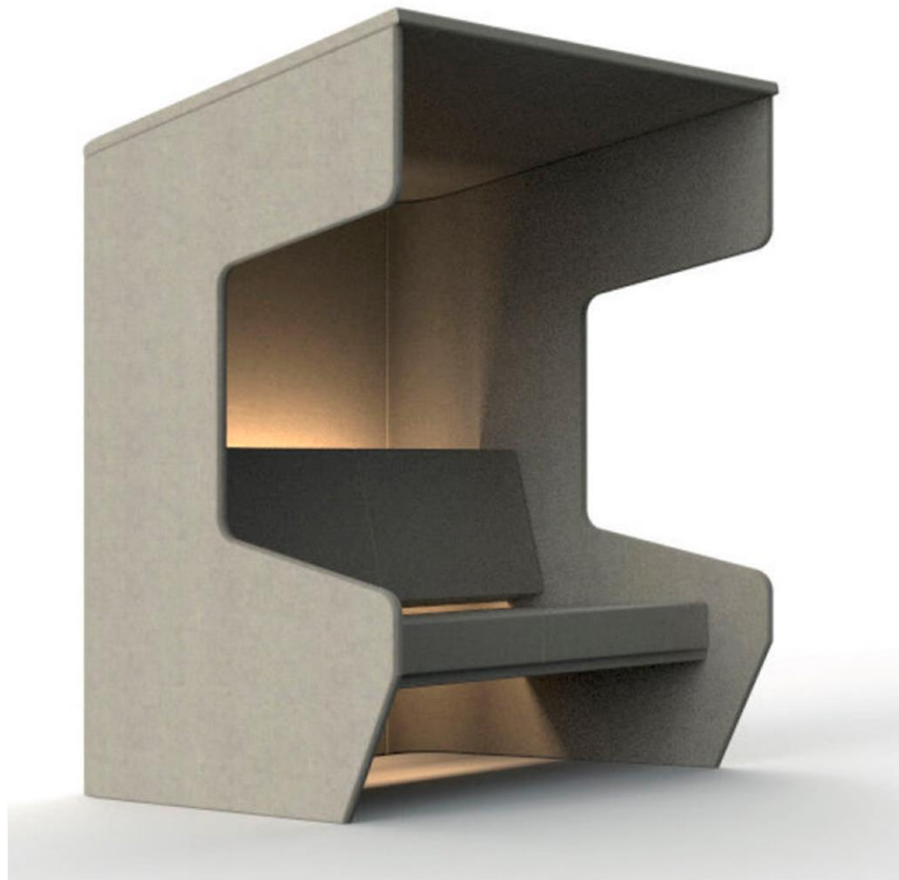

## Temporary Work and Meeting Space

An acoustic cocoon (inspired by train compartments) that ensures a private, three-person meeting room without losing contact with the surroundings. BuzziHive can be used as a stand-alone element in any space. It can also be combined with other BuzziHives, creating a beehive effect.

# BUZZI VILLE HUB OPEN

## A Classic, Lounge Seat

Like the original, a lounge-like seat is enclosed within a three-walled environment for individual or group privacy in open floor plan environments. The new design allows for greater connectivity to the workspaces with cutaway walls. By leaning forward or back, a guest in BuzziHub Open can choose to engage or disengage with the office environment.

# BUZZIBOOTH

*The future of workplace*

## Upholstered Temporary Workstation

A phone booth made of sound absorbing felt that dampens outside sounds. Now you can have a moment alone even in the noisiest of surroundings. Micro-architecture for maxi spaces. While there are many benefits, the challenge is maintaining space to make a phone call or work quietly and independently.

# BUZZICOCKPIT

## Acoustic Desktop Cocoon

The BuzziCockpit is a tool for personal privacy and wellbeing. It is a small, compact and ergonomically-designed acoustical cocoon. It is a piece you can easily add in any office by setting it up on top of any existing table. By doing so, a quieter and more private area is instantly defined within the space. When using it, one should grab the handles and slightly pull the BuzziCockpit closer in order to enhance the acoustic experience.
